With Europe's only laser violin, you can make your event a unique experience

**Mona Seebohm combines classical skills with modern beats to create a spectacular performance - with the only laser violin in Europe.**

## The Show

The laser violin show combines a virtuoso musical experience for your guests with spectacular lighting effects on the violin and bow. A set typically includes one to three pieces of music with a total length of about 7 – 10 minutes. With many years of stage experience, Mona Seebohm will be happy to advise you on music pieces to suit your occasion.

You can combine this segment with other stage lasers, lighting effects or even pyrotechnics. Since fireworks are being used less and less and we can tailor a laser show very specifically to your organization and your messages, this show element is becoming ever more popular. Of course, several sets are possible within the framework of an event.

Most organizers dramaturgically use the show as the highlight of their event or as a festive finale – for example, the Office of the Federal President at the Federal President's Citizens' Festival.

## What do you need?

If you are considering booking the laser violin show, please note that, due to safety reasons, you need to plan for a distance of at least 5 meters between the stage and the audience. A slightly raised stage would be desirable. The use of fog machines is necessary to make the lasers visible. Please keep in mind that at open air events – depending on the weather – a greater amount of fog might be needed. In interior event spaces, smoke alarms must be temporarily disabled for the use of fog. Furthermore, you will need sound equipment and amplification tailored to your event.
